

DECLARATION OF COMPLIANCE

Food Grade Pre-Pressure Sprayer

Product code: P5066

Trade names: 1Litre Capacity Pre-pressure sprayer

This document was prepared on behalf of Klipspringer Ltd and the information included is to the best of our knowledge correct at the time of writing. Klipspringer offers the information within this document as a guide only, they do not represent any guarantee of the prescribed products in the sense of the legal guarantee regulations. It is the responsibility of the end user to ensure the items purchased are suitable for the intended application.

All materials used in the production of the product and which are in direct contact with food: the plastic materials, their additives for ultraviolet protection and colourants, lubricants and O-rings are materials suitable for contact with food. The names of the plastic materials, lubricants and O-rings used are specified below.

Plastic Parts:

Material: Polyethylene Marlex HXM50100
 Materials: Polypropylene Ducor 1100L and Ducor 1040RC
 Ultraviolet protector: Primatech Anti UV 00001 UV
 Colourant: White 06000

Lubricants:

Klübersynth_UH1_64-2403_ES_es

O-rings:

FKM 70° Green with food certificate

The materials with which the aforementioned reference has been manufactured from complies with the legislation on materials intended to come into contact with food pursuant to Regulation 19385/2004/EC and have been manufactured in accordance with good manufacturing practices as set forth in Regulation 2023/2006/EC.

The substances used are included in the Positive List of the Legislation on plastic materials intended to come into contact with food, Regulation 10/2011/EC.

Date of issue	20-07-2016	Revision No.	001	Revised by	SB
Authorised by	S. Britton	Document No.	DOC-1K01	Page 1 of 2	

Substances with a specific restriction limit have not been intentionally used in the processing of the material.

The tests have been carried out pursuant to the UNE-EN 1186-1 and UNE-EN-1186-3 Standards by the CNTA (San Adrián, Navarre, Spain) according to the report 1621039 Goizper Group_Pruebas Migración global:

Results

Parameter	Technical	Result	Units
Global A Simulant migration ME.E.28	Gravimetry	<0.8	Mg/dm ²
Global B Simulant migration ME.E.28	Gravimetry	<0.8	Mg/dm ²
Global D2 alternative (Isooctane) simulant migration ME.E.28	Gravimetry	7.9	Mg/dm ²

The material tested complies with the global migration limit established in the “EU Regulation 10/2001 on plastic materials and articles intended to come into contact with food” and on “Royal Decreed 847/2001 of 17 June wherein the positive list of substances permitted for the manufacture of polymeric materials intended to come into contact with food (10 mg.dm²) for the simulants tested under the above described exposure conditions was established.

The global migration tests were carried out using OM5 conditions, which represent the most unfavourable case conditions for all food simulants in contact with polyolefins.

The referenced materials, under normal foreseeable conditions of use, are suitable for:

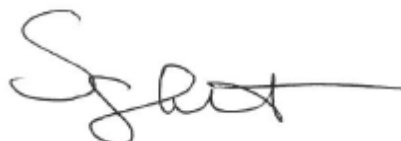

- Contact with all types of food under any condition of time and temperature.

Whenever the recommendation for the storage and use of the materials are complied with which are written in the product specification.
